A Stepwise Safety-Case-Based Regulation System for Deep Geologic Disposal of HLW 9

Chan Woo Jeong · Jinyong Park · Jinmo Ahn · Donghee Lee · Je Heon Bang · Jungjin Kim · Sang-Ho Lee · Sangsu Park · Yo Han Kim (KINS)

다부처공동사업: SNF 저장·처분 안전성확보를 위한 핵심기술개발 심층처분시스템 규제요소 개발 (KINS '21-'29)

● 심층처분 규제접근법 수립

We design a regulation system based on the concept of safety case to guide the development of deep geologic disposal system through a systematic, stepwise procedure.

Basic idea

S C N 4 지구화학적 특성

S C E 1 공학적방벽 구성

S C E 4 완충재 특성 S C E 5 뒷채움/밀봉

S C W 1 Waste form

S C W 2 성분 특성

S C W 방사성폐기물 안전특성

S C E 2

공학적방벽 안전특성

처분구조물 성능 S C E 3 처분용기 성능

• Defining the safety context: Safety objectives & strategy

SDF5_g

- Safety system construction means to comprise the required safety functions
- Safety features of the environment, natural barrier, engineered barriers, and waste
- **System development** is the process preparing and embodying the repository
- Development of disposal site, on-site URL, and the disposal facility
- The safety case integrates the two efforts through the development process
- Generic phase with basic system study, site-specific phase beginning with site survey, and facility-specific phase with practical development of the facility
